The following is an excerpt of transcript prepared by United States Department of Justice, of a tape recorded conversation between Relator Jeff Kenner (JK) and Rhea Crane (RC), the Quality Assurance Manager of Sioux Manufacturing Corporation

RC *. . . and I thought of this many times since I realized that how much have we sent out under weight, under picks, now I can't do anything about what's already happened, so forget it. But if we ever had someone get killed and they decided to investigate why, because they thought maybe the helmet wasn't any good, and they picked that thing apart . . . [finger snap]*

JK *oof*

RC *oof is right*

JK *they say*

RC *they can do the same thing with any of our panels too.*

RC *. . . now, half a pick, I don't think is going to make a big difference, but lets get it right. Lets get it right. If we ever got audited, you know what they would do to us, shut us down and fine us big time. Probably never see another government contract.*
